architectural fixture

RL40M Series
Remote fixture

RP-BLD Series
"Built-in" micro LED
lamps remote fixture

RM Series
LED

RHPRL Series
NEMA-4X rated
remote fixture

RHZRL Series
Hazardous location
remote fixture

MINI-INVERTER SERIES – INTERRUPTIBLE UNIT EQUIPMENT

The **Mini-Inverter** is a cUL Listed stand-alone pure sine wave output inverter designed to provide power to designated emergency lighting fixtures. In a power loss situation, it will supply power from the onboard battery supply. The **Mini-Inverter** is ideal for applications requiring an emergency source for lighting arrangements that utilize multiple lamp and fixture types.

Power rating
300W
600W
1000W
1000W/60-1-4
1440W

Distributor Choice

Ideal for commercial locations, these emergency lighting basics use energy-efficient LEDs and meet our quality standards. Expect performance and reliability from these easy-to-install emergency lights and pictogram signs.
